2021 SOUTH KUIU CLEANUP
DEPOSITION SURVEYS

This was the 4th year conducting a deposition study at the landing beach. In addition, a new study area was established at Comma Cove (Beach 2). A full count of debris type and quantity was made on both surveys as well as total weight of debris collected. (Foamed plastic was counted by volume as well as included in the total weight.)

The initial landing survey was done on July 11, 2021. Ten participants, good weather. The sweep was done on July 18, 2021, with 5 participants. The initial Comma Cove survey was done on July 13, 2021. Eight participants, good weather. The Comma Cove sweep was done on July 20, 2021, with 6 participants. (Sweep results are listed in parentheses on each results page.) The results are then combined to produce the totals, listed in **bold**.

Landing results on second page; Comma Cove results on page 3.
